RESUM

AVANTATGES I ASPECTES INNOVADORS

- The calibration is rapidily and automatically carried out. Calibration lines with more than 40 standards are obtained in a short period of time (5-10 min).
- Only a solution has to be prepared.
- Interferences caused by the sample matrix can be easily eliminated by applying techniques such as standard additions.
- The same system can be applied to linear and non linar calibration, what is very important for some molecular techniques.
- So far this method has provided good results for biological and environmental samples and foods.

APLICACIONS DE L'OFERTA

The method described can be used by any laboratory analyzing liquid samples.

COL·LABORACIÓ BUSCADA

Currently we have the technology required to developing and implantation of the method in an analysis laboratory.
